

ECG CONFERENCE TOPICS

Wednesday's at 7:15am

- The P-wave
- The QRS Complex – I: Normal QRS Complex, Bundle Branch Blocks, Fascicular blocks
- The QRS Complex – II: SVT with Aberrancy vs. VT
- Reentry/Reciprocation and Introduction to EP Studies
- Pearls in Reading ECGs in Patients with Coronary Artery Disease
- Approach to Holter Analysis
- Electrolyte Disorders and Digitalis
- ECG Approach to PM Troubleshooting: “Pseudo-malfunction”
- Lead aVR – “The Stepchild Lead.”
- The "Other" Box on the coding sheet
- Various Manifestations of Sinus Node Dysfunction
- Vagaries of Infra-Nodal Conduction
- Wide complex tachycardias
- Narrow complex tachycardias
- Approach to AV Block
- Preexcitation
- Channelopathies and High-Risk ECGs
- Pacemaker troubleshooting
- Introduction to ICD troubleshooting and Device ECGs
- Narrowing with prematurity
- Manifestations of Dual AV node physiology
- Atrial fibrillation Overview
- Antiarrhythmic Pharmacotherapy for AF
- Radiology
- Anticoagulation: pharmacology
- Hidden in Plain Site: Unusual Diseases
